I just did the combat tutorial and it seemed like it wasn't turn based. I thought it would be turn based. Am I stupid? Go to Pathfinder. Kingmaker r/Pathfinder. Kingmaker • Hi - I just picked up Wrath of the Righteous in the Steam sale, and was wondering how good an experience it is playing the game in turn-based mode rather than real time with pause (RTWP)? Back in the day I played loads of BG1&2 and IWD1&2, which are all RTWP, but I've much preferred the turn based combat approach of the more recent BG3 and Solasta. Does WotR handle turn based combat well? Thanks. Go to NoStupidQuestions r/NoStupidQuestions • It isn't obvious when it's used whether it's good or bad. Where'd this even come from? Go to NoStupidQuestions r/NoStupidQuestions • In relation to gen z slang. I've urban dictionaried it but still don't understand. Is it good? Is it bad? I just about understand "simp" and "stan" but I'm lost on this one. I'm only 24 and yet I feel so old. Edit: thanks for all the comments I think I get the gist now. Still sounds like an insult to me ("you're basic") and/or cringey in itself but I know the lingo now so I can jive with the young hip hoppers Go to FromSeries r/FromSeries • I'm loving the show and, I can't have enough of it. I heard it was inspired on a Stephen King book but it's so hard to Google anything when the name of the show is From. They might wanna add something to the name to make it more easily marketable cuz it's so hard to find info on it as it is Page 2 Go to FromSeries r/FromSeries • Me encanta la serie y no me canso de verla. Escuché que está inspirada en un libro de Stephen King, pero es tan difícil buscar algo en Google cuando el nombre de la serie es From. Quizás deberían agregarle algo al nombre para que sea más fácil de comercializar, porque es muy difícil encontrar información como está Go to TwistedWonderland r/TwistedWonderland r/TwistedWonderland Disney: Twisted Wonderland is a Japanese mobile game, manga, novel and anime created by Aniplex and Walt Disney Japan. The character designs, scenario, and concept was designed by Black Butler creator Yana Toboso, focusing on depictions of villains from various Disney franchises. • Edit: The replies might spoil some details that some EN players haven't experienced, Please be careful! I've never been a fan of Disney and only watched a couple movies as a kid. Can anyone please name the Movies and the characters that the game's characters have been based on? That'll be a great help! Also if someone would like to recommend Disney stuff for people to watch or something feel free to do so, I'll really appreciate it! Thanks! Archived post. But I'm not 100% sure of the usage, especially the 2.-4. usages. (I have read urban dictionary and I'm not asking about usage). But where did it come from? Go to EnglishLearning r/EnglishLearning • Of course I know its original meaning. But on reddit I often see some people comment with only a single word "based" and is actually upvoted which means it makes sense. But I have no idea what it means and I really want to figure it out. Is it a meme? Go to gamingsuggestions r/gamingsuggestions • As someone with boomer reflexes and can't compete in fast-paced games anymore, I really enjoy these types of games where I can just take time to think my actions through. I would prefer something with an e-sports or competitive scene but single player is fine too. PC, PS4, and mobile only. Some games I've played/am playing: XCOM series. To me, the GOAT of turn-based strategy. I'm mainly looking for similar games to this. Civilization series (close second to XCOM), and similar games such as GalCiv and Endless Legend. Breach & Clear, which is like XCOM meets CS:GO. With each "turn", you have to plan your squad's moves for next 5 seconds of combat. I know Total War is turn based (at least the strategy layer), but for some reason this series never really clicked with me. The real-time tactics layer was always too overwhelming for me with so much going on, so I often ended up botching easy matchups. CCGs like Hearthstone, Skyweaver, and Infinity Wars. I used to be a competitive Legend rank Hearthstone player and a Grandmaster in Skyweaver for a time. Honkai Star Rail. Okay, I will get weird looks for this, but I really don't mind the predatory gacha mechanics and the game is very much playable with the free characters provided to the player. Even though I'm open to mobile gachas, please don't suggest Raid: Shadow Legends. While I respect the hell out of it for giving YouTubers a source of income, it got boring for me after the first few hours. Atlas Reactor, but too bad the game is dead. It was the perfect blend of Overwatch and XCOM with a thriving competitive scene at the time. Duelyst and Shardbound, which were like Hearthstone, but instead of cards they had miniatures similar to WH40K. Same as above, both games are dead :(Page 2 Go to gamingsuggestions r/gamingsuggestions • Como alguien con reflejos de boomer que ya no puede competir en juegos de ritmo rápido, realmente disfruto este tipo de juegos donde puedo tomarme mi tiempo para pensar mis acciones. Preferiría algo con una escena de esports o competitiva, pero el modo individual también está bien. Solo PC, PS4 y móvil. Algunos juegos que he jugado/estoy jugando: Serie XCOM. Para mí, el mejor juego de estrategia por turnos (GOAT). Principalmente busco juegos similares a este. Serie Civilization (en segundo lugar después de XCOM), y juegos similares como GalCiv y Endless Legend. Breach & Clear, que es como XCOM se encuentra con CS:GO. En cada "turno", tienes que planear los movimientos de tu escuadrón para los próximos 5 segundos de combate. Sé que Total War es por turnos (al menos la capa de estrategia), pero por alguna razón esta serie nunca me convenció. La capa de tácticas en tiempo real siempre fue demasiado abrumadora para mí con tantas cosas pasando, así que a menudo terminaba arruinando enfrentamientos fáciles. JCC como Hearthstone, Skyweaver e Infinity Wars. Solía ser un jugador competitivo de Hearthstone de rango Leyenda y un Gran Maestro en Skyweaver por un tiempo. Honkai Star Rail. Bueno, me mirarán raro por esto, pero realmente no me importan las mecánicas de gacha depredadoras y el juego es muy jugable con los personajes gratuitos que se le proporcionan al jugador. Aunque estoy abierto a gachas móviles, por favor no sugieran Raid: Shadow Legends. Si bien lo respeto mucho por darle a los YouTubers una fuente de ingresos, se me hizo aburrido después de las primeras horas. Atlas Reactor, pero qué lástima que el juego esté muerto. Era la combinación perfecta de Overwatch y XCOM con una escena competitiva floreciente en ese momento. Duelyst y Shardbound, que eran como Hearthstone, pero en lugar de cartas tenían miniaturas similares a WH40K. Igual que arriba, ambos juegos están muertos :(
